## Professional Experience

### Technical Project Manager, R&D

HealthMEDX (acquired by Netsmart)

**April 2016 - April 2017**

Lafayette, CO (Remote)

- Managed integration projects between our clinical software and a client's unique pharmacy system
- Brought 5 major interfaces into generally available status through stable activations of 12 client organizations
- Collaborated with Product Owners, Development Managers, and QA to ensure software meets client standards
- Owned the integration projects of 9 major clients and their pharmacies to meet NY iSTOP regulatory guidelines

### Associate Project Manager & Application Trainer, Professional Services

HealthMEDX

**January 2014 - April 2016**

Louisville, CO

- Created timelines, software upgrade schedules, and resource bookings on projects 6 to 8 weeks in scope
- Implemented the first internal database of past and existing software implementations on 188 clients
- Conducted on-site software trainings to nurses, physicians, and other clinical roles on electronic health records
- Led multi-facility client through training, data entry, and software go-live in an aggressive 1 month time frame as the only on-site resource
